

WELM Foundation Announces

Welmtech 2.0

Young Earth Podcast Awards

Inter-School Environmental
Podcast Competition

Aims:

- ✓ Promote NEP Technology-Driven environment sustainability education policy.
- ✓ Promote SDG Goals related to environment and sustainability.
- ✓ Create awareness about environmental issues. Improve students' communication and research skills.
- ✓ Encourage creative thinking and teamwork.
- ✓ Introduce students to podcasting, digital media and storytelling.

NEP encourages using digital platforms, simulations, and multimedia apps to teach abstract environmental and sustainability concepts – such as climate change and renewable energy – making the science more engaging and relatable.

WELM Foundation is section 8 Non-profit Organization We are working as a training and capacity building partner with The New Normal for hygiene(Happytap), Punjab State Council for Science and technology ,Project WET, CAWST and Sehgal Foundation & also member of HWTS (The Household Water Treatment and Safe Storage Network) - India Chapter.

Vision:

We are committed to addressing environmental challenges through education, awareness, advocacy, community engagement, and sustainable initiatives for a greener future. By 2030, we aim to empower 50,000 students and 5,000 teachers as change agents for ecological sustainability through innovative learning methods.

Mission:

WELM Foundation is on a mission to empower communities through experiential learning methods to drive awareness, foster behavioral change and assume greater responsibility for water and environmental conservation towards creating a sustainable future.

What We Do:

WELM serves as a dynamic platform dedicated to strengthening human resource capabilities by connecting academic learning with practical environmental applications. The organization promotes environmental education, public awareness, training, information accessibility for informed decision-making, environmental monitoring, and policy advocacy aligned with its core mission and objectives.

A key focus of the organization is conducting capacity-building programs for diverse stakeholders on water issues, pollution control, environmental management, monitoring and analysis. These initiatives are designed to enhance understanding, encourage responsible practices, and support effective responses to environmental challenges.
